Markdown Renderer Test 4: Tables and Layout

This file checks that tables (long, wide, and awkward ones) do not break the page, and that **text size and spacing stay consistent** everywhere. Each section ends with an *Expected* note.

Things to watch for while reading:

- Table text should be the same size as (or very slightly smaller than) body text, never tiny and never huge.
- The page itself must never scroll sideways. A wide table should scroll inside its own container.
- Gaps between headings, paragraphs, lists, and tables should look even and deliberate, with no large empty gaps and no elements glued together.

---

1. Baseline: A Small Table

Body text directly before a table. The gap between this line and the table should match the gap used elsewhere in this document.

Feature	Supported	Notes
Code highlighting	Yes	Fenced blocks
Math	Yes	KaTeX or MathJax
Mermaid	Yes	Diagrams
Tables	You tell me	This is the test

Body text directly after the table. It should not touch the table border, and the gap should not be larger than the gap above.

Expected: a compact table with visible borders or row separators, centered "Supported" column, and even spacing before and after.

---

2. Alignment

Left aligned	Center aligned	Right aligned
apple	1	1.00
banana split	22	22.50
cherry	333	333.75
a much longer left cell value	center	4,444.00

Expected: left column flush left, middle centered, right column flush right with numbers lined up on the right edge.

---

3. Very Wide Table (20 Columns)

This table is far wider than any screen. The page must not gain a horizontal scrollbar. Only the table area should scroll, or the columns should shrink and wrap sensibly.

Col1	Col2	Col3	Col4	Col5	Col6	Col7	Col8	Col9	Col10	Col11	Col12	Col13	Col14	Col15	Col16	Col17	Col18	Col19	Col20
r1c1	r1c2	r1c3	r1c4	r1c5	r1c6	r1c7	r1c8	r1c9	r1c10	r1c11	r1c12	r1c13	r1c14	r1c15	r1c16	r1c17	r1c18	r1c19	r1c20
r2c1	r2c2	r2c3	r2c4	r2c5	r2c6	r2c7	r2c8	r2c9	r2c10	r2c11	r2c12	r2c13	r2c14	r2c15	r2c16	r2c17	r2c18	r2c19	r2c20

r5c1	r5c2	r5c3	r5c4	r5c5	r5c6	r5c7	r5c8	r5c9	r5c10	r5c11	r5c12	r5c13	r5c14	r5c15	r5c16	r5c17	r5c18	r5c19	r5c20
r6c1	r6c2	r6c3	r6c4	r6c5	r6c6	r6c7	r6c8	r6c9	r6c10	r6c11	r6c12	r6c13	r6c14	r6c15	r6c16	r6c17	r6c18	r6c19	r6c20
r7c1	r7c2	r7c3	r7c4	r7c5	r7c6	r7c7	r7c8	r7c9	r7c10	r7c11	r7c12	r7c13	r7c14	r7c15	r7c16	r7c17	r7c18	r7c19	r7c20
r8c1	r8c2	r8c3	r8c4	r8c5	r8c6	r8c7	r8c8	r8c9	r8c10	r8c11	r8c12	r8c13	r8c14	r8c15	r8c16	r8c17	r8c18	r8c19	r8c20

Text after the wide table. This paragraph must be exactly the width of other paragraphs, not stretched to the table width.

Expected: page width unchanged, table scrolls inside itself, this paragraph wraps normally.

---

4. Long Cell Content

Short	Long text cell	Unbreakable string
a	Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.	AVeryLongUnbrokenStringWithNoSpacesThatCouldEasilyOverflowTheCellAndBreakTheLayoutIfTheRendererDoesNotHandleItProperly1234567890
b	Short	https://example.com/a/very/long/url/path/that/has/no/spaces/and/keeps/going/and/going/and/going/until/it/overflows?query=1&other=2
c	Medium length text that wraps once or twice in a normal sized column.	`inline_code_that_is_also_quite_long_and_unbreakable_to_test_code_cells`

Expected: long text wraps inside its cell. Unbreakable strings either wrap, scroll, or get truncated, but never push the page wider than the screen.

---

5. Long Table (60 Rows)

Row count test. The table should render fully, with consistent row height and no row text overlapping.

060	user_060	Pending	495.79	2026-10-27

Paragraph after the long table, confirming normal layout resumes.

Expected: all 60 rows present, numbers right aligned, status centered, even row heights, and the paragraph above sits at normal width and size.

---

6. Rich Content Inside Cells

Type	Rendered	Source
Bold / italic	**bold** and *italic* and ***both***	`**bold**`
Inline code	`const x = 1;`	backticks
Link	Anthropic	`[text](url)`
Inline math	$E = mc^2$	`$E = mc^2$`
Fraction	$\frac{a}{b}$	`\frac`
Sum	$\sum_{i=1}^{n} i^2$	`\sum`
Strikethrough	~~removed~~	`~~text~~`
Escaped pipe	a | b	`|`
Emoji	🚀 ✅ ❌	unicode
Line break	first second	` `
Empty cell		(blank)
HTML	Ctrl + C	`<kbd>`

Expected: each rendered cell shows formatting, not raw syntax. Math cells must not make their rows taller than other rows by a visible, ugly amount. The empty cell stays empty.

---

7. Tables Without Header Padding and With Odd Pipes

Minimal syntax (no outer pipes):

Name	Value
alpha	1
beta	2

Uneven source spacing (should render identically to a clean table):

Name	Value
alpha	1
beta	2

Expected: both render as normal two-column tables, and extra whitespace in the source has no effect.

---

8. Table Next to Other Blocks

A list, then a table, then code, then a quote. Spacing should be uniform between each.

- First item
- Second item
- Third item

A	B
1	2

```
print("code block right after a table")
```

> A blockquote right after code.

Quoted table follows	Value
row	1

Expected: each block is separated from the next by the same comfortable gap. Nothing is jammed together, and nothing has a huge empty gap.

---

9. Text Size and Spacing Audit

Heading 1

Heading 2

Heading 3

Heading 4

Heading 5

Heading 6

Each heading above should be visibly smaller than the previous one, with H6 still readable, and no giant gaps between them.

Normal paragraph text. This is the reference size. Everything else in the document should look proportional to it. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

A second paragraph directly after the first. The gap between these two paragraphs is the standard paragraph gap.

A third paragraph with a hard break after this sentence.
This line follows a hard break, so the gap should be smaller than a paragraph gap.

Tight list (no blank lines between items):

- Item one
- Item two
- Item three
  - Nested item
  - Another nested item
    - Deeply nested item

Loose list (blank lines between items):

1. First item
2. Second item
3. Third item

Ordered list that starts at 5:

5. Five
6. Six
7. Seven

Task list:

- ☒ Done item
- ☐ Open item

Inline `code` inside a sentence should not change the line height, and **bold**, *italic*, and x^2 inline math should not make that line taller than its neighbors.

Line with inline math $\frac{a}{b}$ and $\sum_{i=0}^{n} i$ and another line below it to compare line spacing between them.

A line without any math to compare against.

Expected: consistent line height, monotonic heading sizes, tight lists tighter than loose lists, and inline math not creating oversized lines.

---

10. Code, Math, and Mermaid Next to Tables (Width Check)

A wide code block should scroll inside itself:

```
| this | is | a | very | wide | line | of | text | that | goes | on | and | on |
and | on | past | the | edge | of | the | screen | to | test | overflow |
```

A wide equation should scroll or fit, without widening the page:

$$a_1 + a_2 + a_3 + a_4 + a_5 + a_6 + a_7 + a_8 + a_9 + a_{10} + a_{11} + a_{12} + a_{13} + a_{14} + a_{15} + a_{16} + a_{17} + a_{18} + a_{19} + a_{20} = S \tag{1}$$

A wide Mermaid diagram should scale or scroll:

Figure 1: Mermaid diagram 1

Closing paragraph. If this is the same width and size as the first paragraph in the document, the layout survived every test above.

Final Checklist

- ☐ No horizontal page scrollbar anywhere in the document
- ☐ Wide table scrolls inside its container or shrinks gracefully
- ☐ Long unbreakable strings and URLs do not overflow the page
- ☐ All 60 rows of the long table render, with aligned columns
- ☐ Table text is similar in size to body text
- ☐ Alignment markers (`:---`, `:---:`, `---:`) are honored
- ☐ Bold, code, links, and math all render inside cells
- ☐ Escaped pipe shows a literal `|`; `<br>` makes a line break in a cell
- ☐ Gaps before and after tables match gaps between other blocks
- ☐ Headings shrink steadily from H1 to H6
- ☐ Tight lists are tighter than loose lists; hard breaks are tighter than paragraphs
- ☐ Inline math does not make its line taller than surrounding lines
- ☐ Wide code, equation, and diagram stay inside the page width
